There was a delivery of 14,090
ten-dollar pieces in 1802.
But that does not mean
that they were of the date
of 1802. Coin collectors
and dealers have not
found any of that date.
The lady had better send
us a pencil rubbing of the
coin. If it proved to be
a genuine ten-dollar
piece of 1802, its value
will be over a hundred
dollars.
